2. Donations & Tree Planting

- Donations are used directly for tree planting, maintenance, and environmental restoration projects.
- Every donation results in the planting of a tree, documented with a photograph and GPS location.
- Once a donation is made, it is non-refundable, as funds are immediately allocated to reforestation efforts.
- GlobalForests ensures that trees are planted in suitable locations, selected for maximum ecological impact.

3. Transparency & Accountability

- Donors will receive a confirmation of their contribution along with access to a tracking system showing their planted tree's location.
- While we strive for 100% tree survival, natural events such as droughts or fires may affect some trees. In such cases, replanting efforts will be undertaken.
- Updates on reforestation projects will be provided periodically through our website and email communications.
